

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country journey in their RV. Recently retired, after spending numerous years working with his brother to assemble their crane business into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

While on their journey, John spent time talking to past business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and securely lift individuals in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a joint venture with two friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they created and sold the first JLG aerial work platform. The business incorporates some of the simple design elements of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into several global marketplaces and continues to cultivate innovative machinery to ensure that clients are able to become safer and more well-organized within their workplace.
